

# Eablenex Facilitator Network.

Join the Eablenex Facilitator Network and start contributing to a more sustainable and participatory energy ecosystem.

**Let's shape the future of energy together as energy prosumers!**

[www.eablenex.com](http://www.eablenex.com)

# Background

Today, Nigeria has the largest population of people without access to electricity, at 95 million, about 55% of the population. Nigeria's national grid electricity supply is the least reliable in Africa and has the most frequent and prolonged power outages on the continent. Despite an installed generation capacity of 12.5 GW, only 3.5 to 5.0 GW is typically available—far below the country's energy demand. As a result, most households and businesses rely heavily on diesel and petrol generators, which now account for 80% of Nigeria's operational energy capacity. Nigerians collectively spend approximately USD 14 billion annually on fueling generators and contributed an estimated 29 MtCO<sub>2</sub>e annually.

Nigeria has outlined an ambitious Energy Transition Plan (ETP) to achieve universal access to modern energy services and meet its decarbonisation commitments. This includes the replacement of 6.3 GW of diesel and petrol generators by 2030 with decentralised renewable energy as a key strategy for transforming the power sector. However, significant barriers persist in advancing decentralised energy systems, particularly the high upfront costs of owning clean energy assets. These costs often discourage adoption among citizens, especially given an average minimum wage of just \$44 per month.

To address this challenge, Eablenex has developed an innovative solution to scale the adoption of decentralised renewable energy in Nigeria through solar-powered battery storage systems for shared-use. Eablenex seeks to eliminate the high upfront cost barrier, enabling citizens to access affordable and clean energy for productive businesses and improved livelihoods. This approach not only makes clean energy more accessible but also drives Nigeria's transition to a sustainable and inclusive energy future.

Eablenex is committed to building the world's largest network of portable battery power for shared-use, through its facilitator network. We understand that achieving this goal requires a collaborative effort, which is why we created the facilitator network. By empowering individuals to become solution enablers as energy prosumers, we aim to scale clean energy adoption across Africa.

Join us on this journey to build a brighter future for the continent.

Eablenex is building the world's largest network of portable battery power for shared-use, through its Facilitator Network.

## Vision

*We're revolutionising the way we generate, use and share energy in the renewable era by championing the energy prosumer economy.*

## Mission

*At Eablenex, our mission is to dismantle the high cost barrier limiting the adoption of decentralised clean energy to power communities and business for a sustainable future.*

### Pioneering Africa's Energy Prosumer Economy

In an era where energy access and sustainability are critical, partnering with Eablenex is more than just an opportunity—it's a movement to transform Africa's energy landscape. Through our Facilitator Network, we are pioneering a prosumer-driven energy economy, empowering individuals to generate income, foster clean energy adoption and accelerate the energy transition.

***"At eablenex, we believe energy should work for everyone, everywhere, when they need it."***

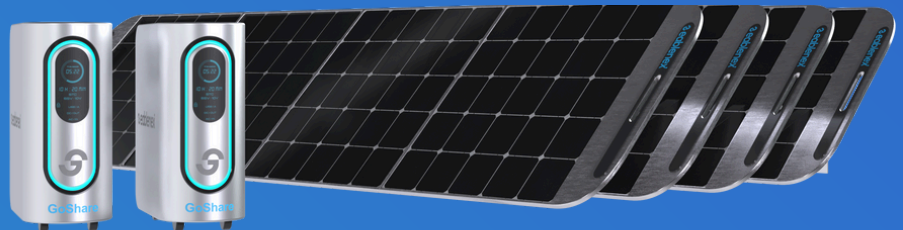

By enabling facilitators to become energy prosumers, we're putting the power of decentralised energy into the hands of everyday people. This approach will democratises energy and create a ripple effect—providing clean, affordable power to communities and businesses while building wealth and advancing the green transition.

### Empower Yourself as a Prosumer

As a facilitator, you're at the heart of the prosumer economy—someone who generates and sells energy. You'll own a share of the future by earning passive income while enabling access to affordable, decentralised energy for households and businesses.

## Our Core Values

### Energy inclusion

Eablenex believes that everyone has a right to reliable and affordable clean energy when they need it

### Gender equity

At Eablenex, we are dedicated to achieving 50% female representation within our facilitator network, empowering women with enhanced income opportunities and fostering their active participation in the clean energy transition.

### Economic empowerment

Eablenex believes that energy access is at the core of inclusive and sustainable economic growth.

# Commitment to SDGs

Joining our Facilitator Network means becoming a changemaker in Africa's energy revolution. You're not just managing a fleet of eablenex batteries; you're driving progress, helping your community reduce reliance on polluting generators, and contributing to the Sustainable Development Goals (SDGs).

*"We understand the challenges faced by communities and businesses in accessing reliable power, and we are dedicated to solving this problem."*

7

Eablenex is committed to deploying 350 MW of decentralised renewable energy capacity, contributing 5% of Nigeria's 6.3 GW target outlined in its Energy Transition Plan. To achieve this, we aim to deploy up to 100,000 eablenex battery storage systems, providing reliable power to 1 million homes and businesses across the country.

13

Eablenex is committed to helping avoid up to 10% in annual CO<sub>2</sub> emissions from petrol and diesel generators in Nigeria to contribute towards a greener future.

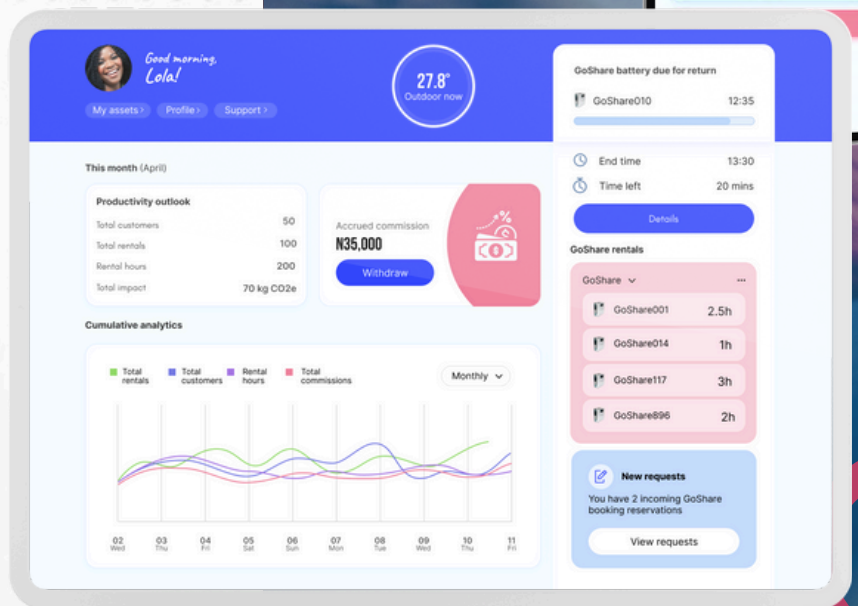

8

Eablenex is committed to creating 10,000 jobs through our facilitator network to drive participation in the energy prosumer economy and enhance economic growth.

 eablenex

## Contribute to our 2030 Impact Goals

**100,000**

portable battery power units to be deployed in more than 200 residential housing estates and commercial markets

**350 MW**

of decentralised renewable energy capacity to be contributed, equivalent to 5% of Nigeria's ETP 2030 target.

**1 Million End-Users**

leveraging eablenex portable battery power for their reliable and affordable energy needs across homes and businesses.

**10,000 Facilitators**

actively participating in the energy prosumer economy through our facilitator network and enhancing economic growth.

**1 MtCO<sub>2</sub>e**

to be avoided, equivalent to 10% in annual CO<sub>2</sub> emissions from petrol and diesel generators in Nigeria.

*Be part of the energy prosumer economy."*

## Why Join the Eablenex Facilitator Network

**Flexible Earning Potential:** Manage your eablenex battery fleet to earn a steady passive income.

**Progressive Ownership:** Begin with part ownership of batteries and advance to full ownership, creating a sustainable business for yourself.

**Lead by Example:** Inspire others to join the clean energy movement and contribute to Africa's economic growth.

## Benefits of Joining

This is your chance to be part of a revolutionary network that's reshaping how energy is accessed, used, and shared.

By joining Eablenex, you're not just creating a brighter future for yourself—you're **lighting up lives across Africa, one battery at a time.**

Take the first step toward becoming a facilitator today and start driving impact where it matters most.

## Joining the Eablenex facilitator network means:

Becoming a pioneer of the energy prosumer economy in Africa.

Becoming financially independent while powering communities and businesses.

Delivering clean energy that works for people and the planet.

*Don't miss this opportunity to join a network of solution enablers and make a positive impact in your community. Become a part of the Eablenex family and help us transform the energy landscape in Africa.*

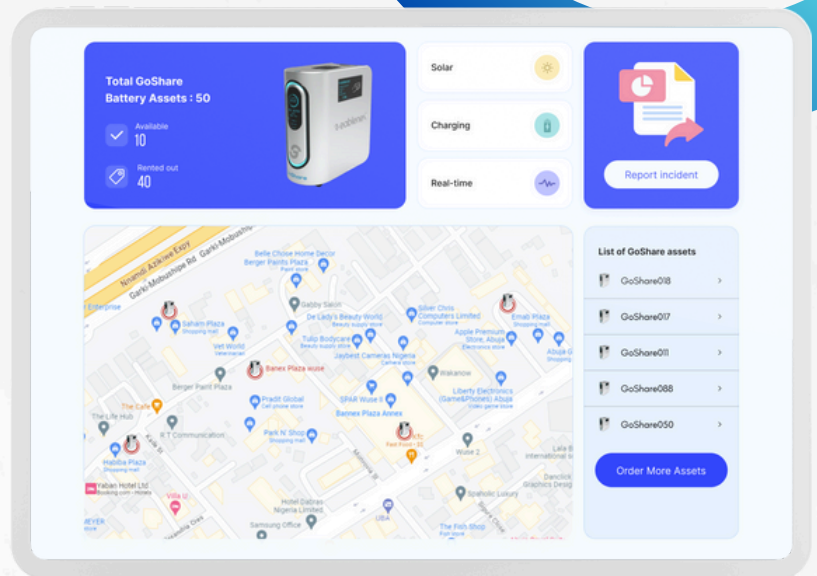

# Facilitator Package

- GoShare battery fleet
- Solar panels to charge your battery fleet
- User manual, including pre-onboarding documents.
- Eablenex App (to receive rental payments, track battery usage and report maintenance check-ins).
- We provide you with full training.

## Entry requirements to become a facilitator

- Access to a suitable operating location.
- Agreement to terms and conditions.
- Basic financial capacity.
- Ownership of a minimum fleet of 5 battery units.
- Ability to use a smartphone or tablet.
- Willingness to undergo training.
- 18+ age to operate fleet.
- No gender restrictions.
- No formal qualification requirements.
- NIN number and BVN needed.

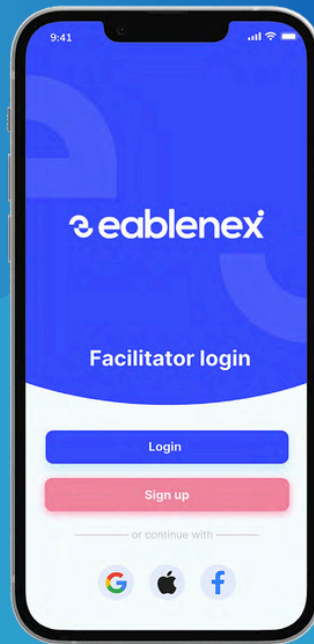

## Your journey starts here, joining the Eablenex Facilitator Network is simple

- **Register Your Interest:** Complete [this form](#) to get started.
- **Sign Membership Agreements:** Formalize your participation.
- **Get Trained:** Receive expert onboarding to manage your battery fleet like a pro.
- **Launch Your Fleet:** Start earning and making an impact immediately.
